## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3, 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Vale (U.S. Patent No. 6,359,572).

Regarding claims 1-3, 6, Vale discloses a hand-held personal computing device 20 having a touch sensitive display 32, a screen input detector 33, ROM 24, RAM 25, processing unit 21, menu button 70 (see FIG. 1 and Col. 2, line 57 – Col 3, line 38) and provides a method and mechanism for dynamically adjusting the meaning and the appearance of one or more

Art Unit: 2684

dynamic keys on the displayed keyboard (see Col.1, lines 49-52). The displayed representation of dynamic keys are user-programmable.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Vale (U.S. Patent No. 6,359,572) in view of Sorensen et al. (U.S. Patent No. 5,761,610).

Regarding claim 7, Vale fails to teach that the hand-held personal computing device 20 is a telephone. Sorensen et al. disclose a portable phone having dynamic menu (see FIG. 1 and Col. 2, lines 5-25). It would have been obvious for those of ordinary skill in the art at time the invention was made to include Vale's functions in Sorensen et al.'s telephone since that would provide convenience for users.

***Allowable Subject Matter***

3. Claims 4-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 2684

Regarding claim 4, the prior arts fail to disclose portable communication apparatus, wherein the controller is arranged, when providing said function for modifying the dynamic menu, to present a list of menu items on the display, the list comprising menu items already located in the dynamic menu, to accept a selection command through the user-controlled input device and in response delete a selected menu item from the dynamic menu.

Regarding claim 5, the prior arts fail to disclose portable communication apparatus, wherein the controller is arranged, when providing said function for modifying the dynamic menu, to provide a function for allowing a user to decide a sequential position of any menu item of the dynamic menu .

### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Isberg et al. (U.S. Patent No. 6,314,285) teach a method and means for setting a personal communication station into a selected operational mode.
- Kraft (U.S. Patent No. 6,381,474) teaches a handset allowing the user to establish a connection via a telecommunications network includes Redo and Undo facilities.
